

airosphera™ CABIN

The ultimate High-end air reformer Optimizing the air in the driver cabin

Airosphera-Cabin balances the CO₂ levels and purifies the air in the driver cabin, creating a safe and healthy environment for productivity and well-being.

- ✓ Supports drivers' health
- ✓ Help boost productivity
- ✓ Lowers risk of accidents
- ✓ Simple & quick installation
- ✓ For any type vehicle

Treats the main causes for breathing and viral disease including CO₂, VOCs, airborne viruses and bacteria. Utilizes unique sensing ability and cloud processing to customize cabin environment constantly.

Maintainig focus safety and productivity

The platform is designed to create optimal cabin conditions, personalized to each driver, by reducing CO₂ levels and air reforming in real time. Using multiple sensors and personal bio feedback processed by AI engine - Aerosphera CABIN aims to keep the driver healthy and alert during long hours behind the wheel.

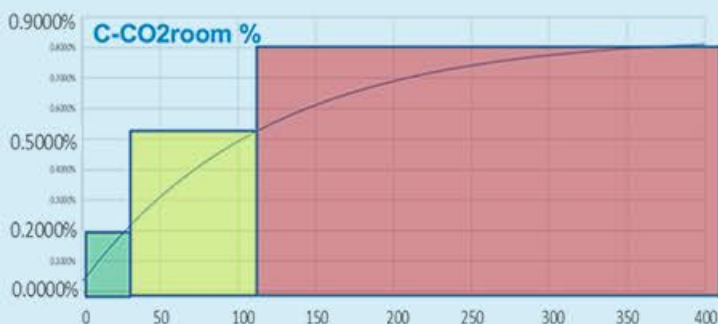

Sensing, treatment and adaptation of cabin environment

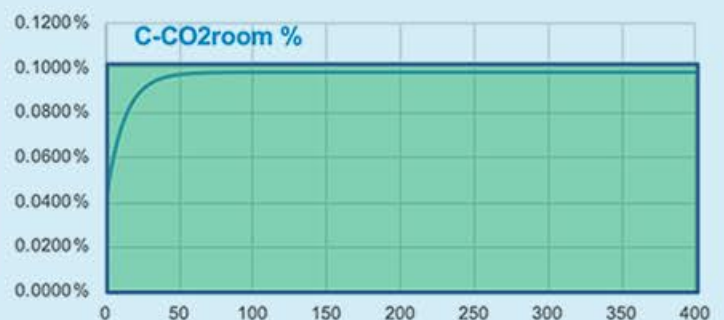

Driving in challenging conditions

During the long hours in the partially ventilated driver's cabin, CO₂ levels increase rapidly and often cause fatigue and reduces the driver's concentration. These can result in damages and life risking situations.

Normal CO₂ levels

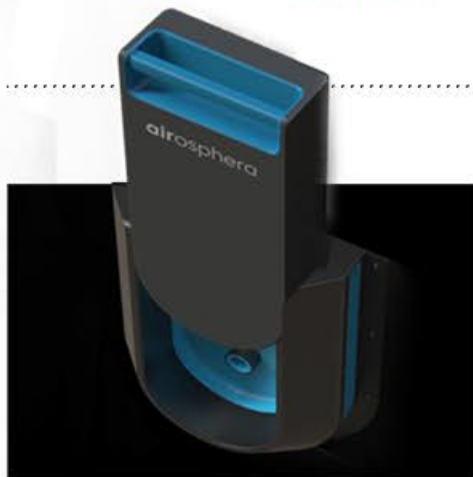

Safe CO₂ levels with Aerosphera Cabin

Ver 2-23

airosphera[™]
CABIN

Aerosphera CABIN preserves the optimal conditions for concentration and productivity

Simple and quick installation
Cartridge replacement once every six months.

Easily reduce the dependence on outside air in difficult weather conditions, long hours on the road and polluted areas, with simple installation.
